Selected Bibliography

Starred items (*) are more introductory. Macfarlane (2005/2015) introduces the problem of logical constants. See also McCarthy (1981), McGee (1996), Goméz-Torrente (2002), and Sher (2003). Etchemendy (2008) is the best place to start for his objections, though see his (1990/1999) for extended discussion. For responses, see McGee (1992), Sher (1996), Hanson (1997), Gómez-Torrente (1999), Soames (1999), and Paseau (2013).
